

Beyond Blended Finance (BBF)

Impact Innovation Institute and **4Sight Solutions** are launching **Beyond Blended Finance**, an action-focused research program to catalyze private investment in public-serving infrastructure at scale and in large and growing volumes.

A by-invitation program, **Beyond Blended Finance** will convene a cross-section of public, quasi-public and private-sector organizations to shape a new framework for funding and financing public-serving infrastructure and build a global relationship network facilitating such investments.

BBF aims at overcoming structural and systemic barriers that are stifling infrastructure investment around the world, thereby inflicting huge and mostly uncounted social, environmental, economic, and public fiscal damage.
